PARTNER IN SOLVING PROBLEMS SINCE 1862

Anchors - Chaincables - Accessories - Towing equipment
About Schmitt Anchors & Chaincables

150 years

With a history, dating back to 1862 Schmitt Anchors & Chaincables has developed into a worldwide supplier of a wide range of anchors and chaincables. This long experience makes Schmitt a perfect partner in solving problems where it concerns anchors and chaincables.

Stock

Schmitt maintains a stock of more than 12,000 tons anchors, chaincables and accessories. We have a 24-hour world wide service for new and used anchors and chaincables and other marine supplies, either for sale or for rent.

Schmitt co-operates with reliable partners for world-wide transport by road, sea or air.

Schmitt is a member of
Installation

Schmitt is located in the middle of the Rotterdam Port area with own quay facilities, for organizing installation work. Mostly installation is being carried out whilst vessel is berthed for loading or discharge.

In case hotwork is not allowed, Schmitt uses a hydraulic sawing machine for disconnecting existing chaincables.

Schmitt has a workboat and own crew who can assist on every occasion. Ports as Amsterdam, Antwerp and Gent can be easily covered by our service team.

Furthermore, Schmitt can provide you an excellent price for the scrap chain/anchors. The weighing can be done after the installation of the new chain/anchors has taken place and the amount for the scrap chain will be credited on the final invoice.

Repairs

Damaged anchors and chaincables are often being transported to Schmitt for inspection, repairing, and if necessary cleaning, testing and storage, waiting for re-use on vessels.
Overview of our **Product** range

We have an enormous stock of chaincables, appliances and all common types of anchors, ready for fast delivery all over the world. Schmitt is a Lloyd’s approved testing house with capacity up to 200 tons.
